

## CALL FOR PAPER

### TOPICS:

- Ecology
- Herpetology
- Aquatic Fauna
- Paleontology
- Genetics
- Plant Biotechnology
- Plant Physiology
- Phytopathology
- Botanies
- Microbiology
- Biology Didactics

### Papers must be submitted electronically to:

*Biotechnology, Plant Physiology & Phytopathology*

Cristian F. BLIDAR: [cblidar@uoradea.ro](mailto:cblidar@uoradea.ro) or [cricrianb2003@yahoo.co.uk](mailto:cricrianb2003@yahoo.co.uk)

*General Zoology, Ecology, Aquatic fauna & Paleontology:*

## PUBLICATION

**Language: ENGLISH**

**Abstracts: IN CONFERENCE VOLUME**

**Full Paper Publication in: “ANALELE UNIVERSITATII DIN ORADEA – FASCICULA BIOLOGIE” - CNCSIS B+ RATED SCIENTIFIC JOURNAL AND COVERED BY MANY INTERNATIONAL DATABASES**

(see [www.bioresearch.ro](http://www.bioresearch.ro))

## **REVIEWING EDITORS:**

**Prof. Dr. Constantin Toma** - "V. Goldiș" University Arad, Romania  
**Prof. Dr. Rupert Gordon Perkins** - Cardiff University , Wales  
**Prof. Dr. Traian-Marian Gomoiu** - "Ovidius" University Constanța, Romania  
**Prof. Dr. Aurel Ardelean** - "V. Goldiș" University Arad, Romania  
**Prof. Dr. Klaus-Werner Battes** - University of Bacău, Romania  
**Prof. Dr. Ing. Camelia Sand** - "L. Blaga" University Sibiu, Romania  
**Prof. Dr. Mihail Drăgan - Bularda** - University "Babeș-Bolyai" Cluj Napoca, Romania  
**Prof. Dr. Iordache Ion** - "Al.I.Cuza" University Iași, Romania  
**Prof. Dr. Anca Mihaly-Cozmuța** - North University - Baia Mare  
**Prof. Dr. Ing. Gheorghe E. Bandici** - University of Oradea, Romania  
**Conf. Dr. Carmen Gache** - "Al.I.Cuza" University Iași, Romania  
**Conf. Dr. Marcel Pârnu** - University "Babeș-Bolyai" Cluj Napoca, Romania  
**Conf. Dr. Sabin Burcă** - University of Oradea, Romania  
**Conf. Dr. Ioana Tomulescu** - University of Oradea, Romania  
**Lect. Dr. Monica Marian** - North University - Baia Mare  
**Lect. Dr. Leonard Mihaly Cozmuța** - North University - Baia Mare  
**Lect. Dr. Severus D. Covaciu-Marcov** - University of Oradea , Romania  
**Lect. Dr. Alina Samuel** - University of Oradea, Romania  
**Lect. Dr. Ilie Telcean** - University of Oradea, Romania

## **EDITORIAL BOARD:**

Lect. Dr. Cristian F. Blidar, Ph.D.Stud.Liviu Pop, Conf.Dr. Diana Cupșa, Assist.Dr.Stud. István Sas

## **EDITOR IN CHIEF:**

Lect. Dr. Cristian F. Blidar  
e-Mail: [cblidar@uoradea.ro](mailto:cblidar@uoradea.ro)

## **Deadlines:**

Registration 1.08.2009

Abstracts: 1.09.2009

Full Papers: 1.09.2009

## **Conference fee:**

The conference fee for all participants includes:

Publication of the paper in the conference proceedings

Conference documents

Refreshments during coffee breaks

The amount of the conference fee is 100 RON.

Optional Dinner: 50 RON

(Pentru participantii romani -for Roumanian participants: Nr. Cont trezorerie RO55TREZ076504601X000278 deschis la Trezoreria Oradea, Codul fiscal al Universitatii din Oradea este 4287939)

# AUTHOR GUIDELINES

“Analele Universitatii din Oradea – Fascicula Biologie” Journal

<http://www.bioresearch.ro/revistaen.html>

## Types of articles:

Both, **original research papers** and **reviews** are welcomed. Review papers should deal with topics of general interest or of contemporary importance, being synthetic rather than comprehensive in emphasis. Authors of Review papers should consult with the editor before submission. Original research papers are welcomed both as **full-length papers** or **short notes**. The editors reserve the right to move manuscripts from one to other category.

## Language and authors:

Only **English** is accepted for publishing in our journal. The maximum number of articles per issue, with the same first author, should not exceed two.

## Preparation of the manuscript:

Manuscripts must be submitted in **electronic version only**, as well as the original figures and tables. The manuscript text should be **MS-Word** processed, typed throughout in letter quality with font size **10, Times New Roman**, without footnotes, **single spaced** (about 63 lines per page), on **A4 (210 x 297 mm) paper**, with **margins** of at least **20 mm** on each side. Don't numbering the pages and don't insert anything on header and/or footer. Maximum number of pages per article should not exceed eight.

For all types of papers, the title page must contain and only contain the following: title of paper (**bold**); name(s) of the author(s); address of the Institution where the work was done, and the name and address of the corresponding author with an e-mail address. Provide a title that is concise but also an informative synthesis of the study. Where appropriate, include mention of the family or higher taxon. Please provide a short running title of five words or less.

The **abstract** of maximum 300 words should summarize the essential results and conclusions. The introduction has to be a concise description of the background, rationale, aims and specific objectives of the paper.

**Materials and methods** have to provide sufficient information to permit repetition of the experiment and/or fieldwork. The technical description of study methods should be given only if such methods are new; otherwise a short presentation is enough.

The **Results** section must be a concise presentation of the finding of the study. Avoid the presentation of same information as text and/or figure and/or table.

**Discussion** section should be separate from the results section at full-length papers and should deal with the significance of the results and their relationship to the aims of the paper. Also include how the findings of the paper will change, influence the state of our knowledge about model organism.

**Short Notes** (generally less than two-three manuscript pages) should be produced as continuous text, preceded by an abstract of no more than 150 words.

**Cited sources** should be referred to as follows: [1], [1, 2], [1-3], [1, 4, 6-9]. All authors of a paper should be cited in the list of references. References "in press" shall only be cited when they have been accepted for publication. Avoid quoting unpublished reports or thesis. Names of persons who provided unpublished information should be cited as follows: "(Andersson, Stockholm, pers. comm. 2007)". List references **alphabetically by author** under *References* and **date of publication at the same author**.

**Journal and series names have to be spelled out fully.**

Use the following format for **references section**:

- [1] Haydon, D.T., Crother, B.I., Pianka, E.R., (1994): New directions in biogeography. *Trends in Ecology and Evolution*, 9: 403-406.
- [2] Huey, R.B., Pianka, E.R., (1983): Temporal separation of activity and interspecific dietary overlap (with an Appendix by S.L. Pimm). pp. 281-296. In Huey, R.B., Pianka, E.R., Schoener T.W. (eds.): *Lizard Ecology: Studies of a Model Organism*. Harvard University Press.

[3] Sokal, R.R., Rohlf, F.J., (1995): *Biometry. The principles and practice of statistics in biological research*. 3rd Edition. W.H. Freeman & co, New York, pp. 35-57.

**Statistics.** Mean values should always be accompanied by some measure of variation. If the goal is to describe variation among individuals that contribute to the mean standard deviation (SD) must be used. When the aim is to illustrate the precision of the mean use rather confidence intervals (CI) than standard errors (SE). Avoid using the sign  $\pm$ , instead present means as: mean 13.15 (1SD: 3.30); 13.15 (1SE: 1.04) or 13.15 [95%CI: 10.78 – 15.51]. Proportions also must be quoted together with a measure of variation according to the respective binomial or multinomial distribution. Sample sizes always have to be noted.

The last paragraph of Materials and Methods section should briefly present the significance test used. Quote when possible the used software. Real  $p$  values must be quoted both at significance or non-significance. The use of the sign is acceptable only at low values of  $p$  (e.g.  $p < 0.0001$ ).

**Ethics.** The authors of articles that are based on experiments that caused injuries or death of animals should explain and justify the grounds of the study and state that the scientific results of the study is at least in trade-off with the sufferings caused. In the *Materials and Methods* of the manuscript, authors should detail as precisely the conditions of maintenance, transport, anesthesia, and marking of animals. When available, references should be added to justify that the techniques used were not invasive. When alternative non-harming techniques exist, but were not used, the manuscripts may not be considered for publication.

**Word 2007.** Unfortunately, the journal cannot accept Microsoft Word 2007 documents. Please use Word's 'Save As' option therefore to save your document as an older (2003 or later) \*.doc file type (never save as \*.docx file).

**Colour Figures:** No Fees!

**Proofs and Reprints:**

Proof will be sent to the **first (or corresponding) author** only once and it should be returned without delay. Corrections should be limited to typographical errors. Following publication, the first (or corresponding) author will be provided with both, electronic copy (.pdf) and **5 reprints** along with the **printed issue** of the journal.

**Peer-Review:**

Each paper will be reviewed by **2-3 independent reviewers**. The editor will decide the acceptance or rejection of the manuscripts according to these reviews.

Moreover, a paper may be rejected without external review if the editors think that it is unacceptable for publication.
