CONTENTS

1. N. Gowrisankar, N. Rajesh - On almost contra-γ-continuous multifunctions 5

2. Sayyed Heidar Jafari, Nader Jafari Rad - On the intersection graphs of normal subgroups of nilpotent groups 17

3. N. Gowrisankar, N. Rajesh - On upper and lower strong γ-continuous multifunctions 21

4. Waggas Galib Atshan, Abbas Kareem Wanas - Differential Subordinations of Multivalent Analytic Functions Associated with Ruscheweyh Derivative 27

5. Takashi Noiri, Valeriu Popa - Weakly Quasi M-Continuous Functions in Bitopological Spaces 35

6. Farid Messelmi, Abdelbaki Merouani - Properties of the Laminar Flow of Herschel-Bulkley Fluid 47

7. Shahram Najafzadeh, E.Pezeshki - Some aspects of univalent holomorphic functions involving Ruscheweyh and Salagean operators 61

8. Arezki Touzaline – A viscoelastic frictional contact problem with adhesion 71

9. Poonam Sharma - Subordination and superordination properties involving Wright's generalized hypergeometric functions 83

10. Chang-Jian Zhao, Mihaly Bencze - A new Holder-type inequality and its application 99

11. Ahmad Al-Omari, Takashi Noiri - Some weak separation axioms in a weak structure space due to Csaszar 105

12. Vasile Marius Macarie, Daniel Breaz - On the convexity of an integral operator 113

13. Ritu Sen - Local Connectedness in Hyperspace Topology 117

15. Laura Stanciu - Some properties for a new integral operator on the classes $S_λ^b(b)$ and $C_λ^b(b)$ 137

16. B.A. Frasin, N.Magesh, S. Porwal – Univalence criteria for general integral operator 143

17. Didem Aydin, Ali Aral - Some Approximation Properties of Complex $q$-Gauss-Weierstrass Type Integral Operators in the Unit Disk 155

18. Zinelaâbidine Latreuch, Benharrat Belaïdi - New Estimations About the Order of Growth and the Type of Meromorphic Functions in the Complex Plane 169

19. Mohammad Zurigat - The multi-step analytic method and application for approximating a giving up fractional smoking model 177
