

CONTENTS

1. Mitrofan M.Choban, Ina D. Ciobanu - On compact subsets of free topological algebras	5
2. Alias B. Khalaf, Suzan N. Dawod, Saeid Jafari – g^*bp -continuous, Almost g^*bp -continuous and Weakly g^*bp -continuous functions	11
3. Sanjib Kumar Datta, Tanmay Biswas, Md Azizul Hoque - A Direction to the Results on Relative Order Based Growth Properties of Differential Polynomials	27
4. Laura Stanciu - Two integral operators and their univalence	37
5. Arindam Sarkar, Paulomi Chattopadhyay - Meromorphic Functions Sharing Two Sets	43
6. M.Parimala - Strongly b - I -open sets in ideal topological spaces	51
7. R. A. Rashwan, D. M. Albaqeri - Common random fixed point theorems of nonself asymptotically quasi-nonexpansive-type mappings in convex metric spaces	57
8. Mugur Acu, Petrică Dicu, Radu Diaconu – Preserving properties of p -valent functions	69
9. Alb Lupaş Alina– On a certain subclass of analytic functions involving multiplier transformation and Ruscheweyh derivative	73
10. Lakehal Belarbi, Mohamed Belkhelfa - Some Results in Riemannian Manifolds with Density	81
11. Adriana Cătaş - Subordination results associated with multiplier transformations	87
12. Igor Chyzhykov, Mariia Voitovych - On the growth of spirallike functions	93
13. Mugur Acu, Petrică Dicu– Integral operators onto the class of meromorphic functions $MR_2(n, \mu, \gamma)$	101
14. Junichi Nishiwaki, Shigeyoshi Owa - On uniformly-type Sakaguchi functions	107

15. Yaşar Polatoğlu – Harmonic Mappings Related To m-fold Symmetric Janowski Starlike Functions 113
16. Neslihan Uyanik, Shigeyoshi Owa – Coefficient problems for certain analytic functions related to some differential operators 119
17. R. Sahraoui, A. Bourega – Approached Problems in Optimization 127
18. Yasemin Kahramaner - Harmonic mappings related to the class of generalized p-valent Janowski close-to-convex functions 139
19. Alb Lupaş Alina – On a certain subclass of analytic functions defined by multiplier transformation 149
20. Hasan Yurt – Approximation in Weighted Lebesgue and Smirnov Spaces with Matrix Transforms 155
21. Adela Olimpia Venter – On special fuzzy differential subordination using Ruscheweyh operator 167
22. Georgia Irina Oros, Gheorghe Oros, Daniela Andrada Bardac-Vlada – Differential subordinations and superordinations obtained with some new integral operators 177
23. Roberta Bucur, Daniel Breaz – Third Hankel determinant for starlike and convex functions with respect to conjugate points 185
