CONTENTS

1. Şahsene Altinkaya and Sibel Yalçin – Poisson Distribution Series for Certain Subclasses of Starlike Functions with Negative Coefficients 5

2. Olga Engel – On a class of analytic functions defined by the Sălăgean integral operator 9

3. S. Porwal, N. Magesh and C. Murugesan – On certain classes of analytic functions involving Poisson distribution series 15

5. Soley Ersoz, Aysenur Türkoğlu and Hilal Polat – Anti-Spaces of Strongly k-Spaces 29

6. Mohammed Amin Abdellaoui and Benharrat Belaïdi – Growth and Oscillation of Some Polynomials Generated by Solutions of Non-Homogeneous Complex Linear Differential Equations 37

7. P.Nandini and S. Latha – Coefficient inequalities for certain classes of analytic functions using q-Ruscheweyh derivative 47

8. Firooz Pashaie – On $L_1$-biharmonic spacelike hypersurfaces in pseudo-Euclidean space $E^5_1$ 53

9. G. S. Saluja – Strong and weak convergence theorems of a new iterative scheme with errors for two finite families of generalized asymptotically quasi-nonexpansive mappings 63

10. M. Lellis Thivagar, M. Arockia Dasan, V. Ramesh – New Sort of Ideal Spaces in N-Topology 75

11. Serap Bulut – Faber polynomial coefficient estimates for a certain subclass of analytic bi-univalent functions 85

12. Ghiocel Groza and Marilena Jianu – Functions of two variables represented into Newton interpolating series 91

13. Khaled Zennir and Sewalem Beumy Ghanem – Global existence of solution for semi-linear wave equation of Kirchhoff type with memory in $R^n$ 101

196

15. Georgia Irina Oros, Gheorghe Oros and Daniela Andra Bardac-Vlada – Differential subordinations obtained using generalizations of Hallenbeck, Ruscheweyh and Suffridge theorems 121

16. Asghar Khan, Muhammad Izhar and Jian Tang – Uni-soft structure applied to ordered AG-groupoids 129

17. Ajoy Mukharjee and Arup Roy Choudhury – Asymmetric dual semi-open sets 145

18. Anjana Bhattacharyya – Some Different Types of Fuzzy Normal Spaces 151

19. A. Kanibir – On the completeness in generalized neighborhood systems 165

20. Belaala Maatougki – Lipschitz $\phi$-summing operators 175
