CONTENTS

1. Artion Kashuri, Rozana Liko – Some new Ostrowski type fractional integral inequalities for generalized relative semi-(m,h)-preinvex functions via Caputo $k$-fractional derivatives 5

2. Lynda D. Oudjedi, Moussadek Remili – Stability, boundedness and square integrability of solutions to third order nonlinear vector differential equation 23

4. Noureddine Bouteraa, Slimane Benaicha – The uniqueness of positive solution for nonlinear fractional differential equation with nonlocal boundary conditions 53

5. Saurabh Porwal, Gangadharan Murugusundaramoorthy – Mapping Properties of Poisson Distribution Series on Some Subclasses of Univalent Functions 67

6. T. Panigrahi – A certain new class of analytic functions associated with quasi-subordination in the space of modified sigmoid functions 77

7. Tanmay Biswas – On some bounds involving $(p,q)$- relative Ritt type and $(p,q)$-relative Ritt weak type of entire functions represented by vector valued Dirichlet series 85

9. G.S.Srivastava, Akanksha Sharma – Multipliers on Spaces of Vector Valued Dirichlet Series 107

10. Mustafa Habil Gürsoy – Bundles of Topological Generalized Groups 115

11. Ajoy Mukharjee, Madhusudhan Paul, M. K. Bose – On some weaker and stronger versions of compactness 121

12. Rajendra Prasad, Shashikant Pandey – Semi-slant Riemannian Maps from Almost Contact Manifolds 127

223
14. Ajab Bai Akbarally, Nur Alia Jamahushaini, Serap Bulut – Faber polynomial coefficient estimates for a subclass of analytic bi-univalent functions defined by Carlson-Shaffer operator

15. Pravati Sahoo – Some Radius Problems on Certain Subclasses of Analytic Functions

16. Balvir Singh, Divya Bajpai – Comprehensive family of harmonic univalent functions defined by $q$–calculus

17. B. Meftah – Some Ostrowski's inequalities for functions whose $n^{th}$ derivatives are $s$-convex
