CONTENTS

1. B.A. Frasin – Univalence conditions for an integral operator of analytic functions 5

3. Mihai Ivan, Marian Degeratu – A method for computing of group-subgroupoids of finite group-groupoids 25

5. Vlad Ciobotariu-Boer – On some common generalizations of two classes of integral inequalities for twice differentiable functions 43

6. Abiodun Tinuoye Oladipo – Harmonic function prestarlike associated with generalized Bessel functions 51

8. Anjana Bhattacharyya – Fuzzy Almost $s^\ast$-Compact Space 73

9. M. Lellis Thivagar, V. Sutha Devi – Another form of Nano topology via ring structure 89

13. Sever Hodis, Laura Mesaroș – A Thunsdorff type inequality 131
14. M. Sidiq and K. O. Babalola – Two radii for certain Bazilevič maps 135
15. Jayanta Ghosh, Dhananjoy Mandal, T. K. Samanta – Soft semiprimary int-
ideals of a ring 143
16. Sanjib Kumar Datta, Tanmay Biswas – \((p,q)\)-th relative Ritt order of entire 
functions in the form of vector valued Dirichlet series 155
17. G. S. Saluja – An implicit iterative algorithm for two finite families of 
asymptotically quasi-nonexpansive mappings in the intermediate sense in convex 
metric spaces 165
18. Xhevat Z. Krasniqi – Characterizations of \((p,q;\alpha)\)-convex sequences 177
19. Sorin Trifa – Approximation of Analytic Functions with an Arbitrary Order by 
Baskakov-Kantorovich-Faber and Szasz-Kantorovich-Faber Operators in Compact 
Sets 183
20. Adonia - Augustina Opriş – About a family of Bernstein operators 189
