

CONTENTS

1. Ritu Sen – On some variations of $\mathcal{F}$ -Menger spaces	5
2. Sheza M. El-Deeb and H. Orhan – Fekete-Szegő Problem for a Class of Analytic Functions Connected with q -Analogue of Integral Operator	15
3. George A. Anastassiou – Conformable Fractional Approximation of Csiszar's f -Divergence	27
4. Takashi Noiri and Valeriu Popa – On Contra m - I -Continuous Multifunctions	41
5. Ahmed Benzian, Yamna Boukhatem and Benyattou Benabderrahmane – General decay of solutions for a system of variable coefficients viscoelastic wave equations with damping terms	55
6. Saurabh Porwal and Sanjay Kumar Ghai – A new subclass of harmonic univalent functions defined by q -calculus	81
7. Abbas Kareem Wanas, Xiao-Yuan Wang and Serap Bulut – Applications of Horadam Polynomials for a New Family of Bi-Univalent Functions Associating Bazilevič Functions with λ -Pseudo Functions	97
8. H. Erhan Altin and Harun Karsli – Some approximation properties of a nonlinear Szász-Mirakyan-Durrmeyer operator	105
9. Kamiludeen Tijani and Abdulraouf Alabi – On coupled fixed point theorems involving two metrics	115
10. A. K. Wanas and J. Sokół – Second Hankel Determinant for Analytic and Bi-Univalent Functions with Respect to Symmetric Conjugate	125
11. Iancu T. Ionuț – Quantitative Grüss-type inequalities for Kantorovich operators	135
