

CONTENTS

1. B. Brundha, S. Shanthi and N. Rajesh – Local function via ω -open sets in the sense of Sundaram	5
2. Dan Dumitru and Rodica Ioan – Some remarks on filled-in Julia sets	19
3. S. Jafari, T. Menahadevi, P. Maragatha Meenakshi and N. Rajesh – On intuitionistic r-fuzzy α -continuous multifunctions	25
4. Farid Messelmi – Modified 3-Split Dirac Operator	35
5. A.A. Ayeni, I.T. Awolere, A.T. Oladipo and S.R. Swamy – Application of Gegenbauer Polynomials to Bi-univalence Involving the Sigmoid Activation Function	51
6. Remi K. Kouakou, Firmin K. N'Gohisse and Nabongo Diabate – Behavior of the blow-up time of a nonlinear hyperbolic equation with Dirichlet boundary conditions and a potential	69
7. Amadou Diop, Mamadou Moustapha Mbaye, Yong-Kui Chang, Gaston N'Guerekata – On square-mean S -asymptotically Bloch type periodicity of some stochastic evolution equations	83
8. S. Annapoorna and L. Dileep – Neighborhood properties of Linear Multiplier Fractional type analytic functions	113
9. Alexandru G. Atim and Robert R. Kallman – The Projective Unitary is Algebraically Determined Polish Group	119
10. George A. Anastassiou – General sigmoid function based complex valued trigonometric and hyperbolic neural network high order approximations	127
