

CONTENTS

1. P. Nandini, L. Dileep and S. Latha – Fekete-Szegő inequality for certain subclasses of analytic functions with respect to (j,k) -symmetric points 5
2. G. S. Saluja – Common fixed point theorems on complex valued S -metric spaces using a control function 15
3. Abidi Jamel – Continuous functions and the complex structure in several variables 31
4. Touzaline Arezki – Optimal control of a frictional unilateral contact problem 55
5. George A. Anastassiou – Hyperbolic Tangent Like induced Banach space valued neural network approximation 71
6. W. Y. Kota and R. M. El-Ashwah – New subclass of harmonic univalent functions defined by Q -calculus operators 83
7. G. S. Saluja – Coupled fixed point theorems involving control function in partial metric spaces 95
8. Olushola Adeyemo, Abiodun Tinuoye Oladipo, Rabha M.El-Ashwah – Truncated tangent polynomials equipped with generalized Pascal snail 119
9. George A. Anastassiou – Parametrized error function based Banach space valued multivariate multi layer neural network approximations 129
