

CONTENTS

1. Dhananjay Mandal, Manik Das and M. N. Mukherjee – μ -paracompactness in a μ -space via hereditary classes	5
2. Saeid Jafari and Takashi Noiri – Contra-Strongly M-precontinuous Functions	15
3. Touzaline Arezki – Optimal control of a frictionless contact problem in isotropic incompressible linear elasticity	23
4. Abdelhamid Hallouz – The Klein-Gordon Equation With Dynamic Boundaries Dissipation of Fractional Derivative Type	35
5. Takashi Noiri and Valeriu Popa – Upper and Lower Weakly (τ, m) -J-Continuous Multifunctions	55
6. Abderrahim Zagane, Aydin Gezer and Nour Elhouda Djaa – Notes on the integrability of F -structures of degree K satisfying $F^K + (-I)^K F = 0$	65
7. Heeramani Tiwari and Padmavati – Some fixed point results for generalized integral type α - ψ - F contraction mappings in partial metric spaces	79
8. Kaiyang Wang and Xiaoyuan Wang – Toeplitz determinants and Logarithmic coefficients for a subclass of starlike functions	91
9. Méthode Koyabanda and Gaston. M. N'Guérékata – Existence results for a generalized nonlocal abstract Cauchy problem via the ψ - Hilfer derivative	105
10. George A. Anastassiou – Approximation by Complex Activated Singular Integral Operators	125
