

CONTENTS

1. G.S. Saluja – Common fixed point theorem in partial b -metric spaces involving simulation function	5
2. Mallikarjun G. Shrigan and Sibel Yalcin – Spiral-like functions associated with Wright distribution series	19
3. S. Jafari, J. Princivishvamalar and N. Rajesh – Interval-valued fuzzy b -continuous mappings	31
4. Hamza Wahid Hammad and Ahmad H. A. Bataineh – Orlicz vector spaces of entire sequences and some related results	39
5. N. Rabo and S. Ouaro – The existence of three positive solutions of nonhomogeneous singular Kirchhoff problems	51
6. B.T. Rashmi and L. Dileep – Application of Linear Multiplier Fractional q -Differintegral Operator on Varying Arguments	77
7. Ibrahime Konate, Ibrango Idrissa and Stanislas Ouaro – Nonlinear problem having natural growth term and measure data	85
8. Bilender P. Allahverdiev, Huseyin Tuna and Hamlet A. Isayev – The resolvent operator of singular impulsive dynamic Dirac equations	115
9. George A. Anastassiou and Dimitra Kouloumpou – Multivariate Fuzzy-Random and Perturbed Neural Network Approximation	127
