

CONTENTS

1. G.S. Saluja – Some fixed point theorems of integral type contraction in cone S_b -metric spaces	5
2. M. Murali Krishna Rao and Noorbhasha Rafi – A Study of Fuzzy Ideals of Regular and Simple Ordered Semirings	23
3. Takashi Noiri and Valeriu Popa – Upper and Lower Weakly LPT m - I -Continuous Multifunctions	39
4. Saeid Jafari and Mark Petersen – On Minimal Variance Projection Profiling	53
5. Arezki Touzaline – Boundary optimal control of a frictionless contact problem with locking materials	67
6. Ömer Kişi, Burak Çakal and Mehmet Gürdal – A few notes on the deferred statistical convergence of sequences in g -metric space with quaternion values	83
7. Karabulut Oguzhan and Karsli Harun – An algorithm for approximate solutions of Volterra integral equations using truncated Baskakov operators	103
8. George A. Anastassiou – Multivariate generalized right side fractional Taylor formula and Landau inequalities	119
9. Ömer Kişi and Rümeysa Akbıyık – Some inclusion relations for Wijsman deferred almost statistical convergence and strongly deferred almost convergence of sequence of sets	131
