

CONTENTS

1. G. S. Saluja – Some fixed point theorems on S-metric spaces using C-class functions with applications	5
2. Arezki Touzaline – A unilateral frictional contact problem	19
3. Hocine Mohamed Braiki, Mama Abdelli, Naima Louhibi, Ali Hakem – Well-posedness and general decay of solutions for a Petrovsky equation with a memory term	31
4. Daniel. A. Romano – Concept of filters in JU-algebras	45
5. G. S. Saluja – Some fixed point theorems via simulation functions on S-metric spaces	55
6. Sinem Tarsuslu (Yilmaz) – Intuitionistic Fuzzy Quasi-Interior Ideals in Ordered Γ - Semigroups	71
7. Ali Hakem and Svetlin G. Georgiev – Classical solutions for the semi-linear Moore-Gibson-Thompson equation	81
8. P.Jeyanthi, G.Geetha, Ahmad Al-omari – Generalized developable spaces	93
9. George A. Anastassiou – γ - Schatten norm Generalized Canavati Fractional Hilbert-Pachpatte type inequalities for von Neumann-Schatten class $B_\gamma(H)$ valued functions	103
10. George A. Anastassiou – Generalized symmetrical sigmoid function activated Banach space valued ordinary and fractional neural network approximation	117
11. Munuse Akcay and Gulen Bařcanbaz-Tunca – Approximation properties of bivariate Jain operators	135
