

## CONTENTS

1. Sagar Mandal – Prime Divisors of 10's Friends: A Generalization of Prior Bounds	5
2. Takashi Noiri and Valeriu Popa – Almost $(i, j)$ - $m$ - $I$ -Continuous Multifunctions on Ideal Bitopological Spaces	13
3. Arezki Touzaline – Optimal control of a frictionless unilateral contact problem for locking materials	23
4. Idris Zorlutuna – Continuity of multifunctions via $\mathcal{S}$ -open sets	33
5. Murat Altunbaş – On $\eta$ -Ricci solitons on homothetic Kenmotsu manifolds with respect to a general connection	45
6. G. S. Saluja – Common fixed points for generalized multivalued mappings via simulation function in $\mathcal{S}$ -metric spaces	55
7. Qi Gao, Wangbo Li, Shuaikun Shao – Some Results on the Dual Smale's Conjecture	77
8. Milutin Obradović and Nikola Tuneski – New upper bounds of the third Hankel determinant for some classes of univalent functions	83
9. Anoh Assiédou Rodrigue, Diabaté Tchilomian Paterne Armand, Camara Gninfan Modeste and Touré Kidjégbo Augustin – The Quenching for a Nonlinear Diffusion Equation with Nonlinear Singular Boundary Condition: Numerical Approximation	93
10. Abdelhamid Hallouz – Well-posedness and Indirect Stabilization of the Non-degenerate Schrödinger Equation	109
11. George A. Anastassiou - Multiple-composite multivariate quantitative approximation by Kantorovich-Shilkret Neural Networks	129
